20	User not configured correctly, please contact support.	User not configured correctly. Remove the user and readd.
21	Invalid username.	The merchant didn't type in a valid username when adding a new user.
22	You do not have access to this page.	The user tried to access a page they don't have permission to access.
23	Specified source key not found.	The source key provided did not match any of the currently active keys.
24	Transaction already voided.	The transaction was already marked as voided and wasn't going to be settled anyway.

Error Messages

Error ID	User Message	Technical
25	Unable to find transaction in batch.	The batchid on the transaction references a batch that doesn't exist. If there isn't a valid batch then trying to void a transaction isn't going to do much
26	The batch has already been closed. Please apply a credit instead.	The specified transaction has already been settled. Once a transaction has been sent in for settlement it can not be voided.
27	Gateway temporarily offline. Please try again shortly. (2)	Error communicating with the processing backend. Retry transaction.
28	Unable to verify source	VerifySource couldn't find the source or the source was disabled
29	Unable to generate security key.	VerifySource wasn't able to create a source on the fly. Trouble finding a key.
30	Source has been blocked from processing transactions.	Merchant has disabled the specified source key.
31	Duplicate transaction, wait at least [minutes] minutes before trying again.	The duplicate transaction fraud module detected a dupe.
32	The maximum order amount is \$[amount].	Fraud module response
33	The minimum order amount is \$[amount].	Fraud module response.
34	Your billing information does not match your credit card. Please check with your bank.	AVS Response fraud module blocked this transaction.
35	Unable to locate transaction	Was not able to find the requested transaction for voiding.
36	Gateway temporarily offline for maintenance. Please try again in a few minutes.	VeriCheck link has been brought down for maintenance. Retry transaction.
37	Customer Name not submitted.	Cardholder field was blank
38	Invalid Routing Number.	Check Routing number did not meet requirement of 9 digits
39	Invalid Checking Account Number.	Check Account number is not atleast 4 digits long
40	Merchant does not currently support check transactions.	The merchant doesn't have a valid tax id or password entered for check processing.
41	Check processing temporarily offline. Please try again shortly.	Internal system error encountered while communicating with check processor. Please contact USAePay support.
42	Temporarily unable to process transaction. Please try again shortly.	A corrupted response (unparsable) was received from vericheck
43	Transaction Requires Voice Authentication. Please Call-In.	Processor returned a referral.
44	Merchant not configured properly (CardAuth)	The merchant has payment authentication enabled but does not have a processorid/merchantid entered
45	Auth service unavailable.	Internal system error was encountered while connecting to authentication platform. Contact USAePay support.
46	Auth service unavailable (6).	A corrupted response was received from the authentication platform.
47	Invalid record locator key	The key submitted to lookup a record (such as Transaction or Batch) was not formatted correctly or was not of the correct type. For example tried to retrieve a batch with a transaction key
48	Unable to locate invoice. Invalid Invoice Key was provided.	Error pulling invoice from the database.
49	Merchant ID mismatch for record locator key	The key submitted to lookup a record does not belong to the authorized merchant

Error Messages

Error ID	User Message	Technical
50	Invalid SSN.	Social Security number must be 9 digits.
51	Failed to create '[object]' due to invalid data	Unable to create object due to validation errors. Fix invalid data and try request again.
70	Transaction exceeds maximum amount.	Transaction exceeds the maximum allowable amount of \$99,999.
71	Transaction out of balance.	Transaction does not add up correctly. subtotal + tip + tax + shipping - discount must equal the amount.
79	Unable to [action], please contact support.	Unable to perform action. Try again or contact support.
80	Transaction type not allowed from this source.	The requested command (sale, authonly, etc) was blocked by the merchant's source key. The command must be checked on source key settings screen to be accepted by the gateway.
81	Unable to apply changes, please retry.	Failed to commit changes to transaction. Possible locking or db syncing problem. Contact support.
82	Check transactions can not be voided.	Check transactions cannot be voided (canceled) due to the process flow of check transactions. Contact the check processing company or issue a reversal.
83	Transaction not approved	Only approved transactions may be voided
84	Pin code required to use this command.	This command must be validated using a pin. The source key used does not have a pin set. The merchant must configure the source key to include a pin before accessing this command.
85	Invalid expiration date. Must be in MMY format. (3)	The month was not in the range of 1-12. This could be because the expiration was sent as YMMM. Valid expiration date must be sent as MMY
